The Conservation Pledge

I pledge to protect and preserve the natural resources of the planet Earth, and promise to promote education so we may become caretakers of our air, water, land, forest, and wildlife.

Poly Put the Kettle On

The \$2.2 billion Solar Electric plant that launched in February near *Primm*, NEVADA, dazzles pilots flying in and out of *Los Angeles* and *Las Vegas*. The mirrors focus sunlight into very tall boiler towers that heat steam to generate electricity, and the concentrated sunrays are igniting birds in flight.

Up to 28,000 birds may be killed this year according to the *Center for Biological Diversity*. While the *U.S. Fish and Wildlife Service* tracks the bird kill for a full year of operation, the federal wildlife investigators have halted plans for an even bigger solar tower plant nearby.

The CALIFORNIA chapter of the *Audubon Society* wants caution before any more permits for that kind of solar technology is granted because a new proposal is a location in the flight path for golden eagles, falcons, and more than 100 other bird species.

(Source: August 19, 2014, MAIL TRIBUNE, “*Solar Plant Scorches Birds out of Sky*” by Ellen Knickmeyer and John Lochner, The Associated Press)

Geo Engineering

I know you’re wondering about all the secrecy surrounding both *Bio Engineering* and *Geo Engineering*. Millions of tons of toxic chemicals have poisoned the planet since the debut of MONSANTO. Now millions of tons of expensive **chemical aerosols and toxic metals** are annually sprayed into the sky.

Forest health has been disrupted, and the die off is not just the pollinators. As many as 200 species of fauna and flora go extinct every day. Lab tests have disclosed extremely high levels of ALUMINUM, BARIUM, CADMIUM, STRONTIUM, and TOXIC CHEMICALS worldwide in atmospheric tests, rain, and ground water.

Did you know that the bee die off is even in remote areas where the only likely source of contamination is *Geo Engineering*. Could it be that the CIA’s “*Evergreen Air*” patent number 7413145 for “*Systems and Methods for Aerial Dispersion of Materials*” is making the pollinators ill.

.....

October 3, 2014

Page 2

Like the bees, do you suffer from the chemtrails being deployed to change the weather. Just suppose there is a strong correlation to the CIA's "*Evergreen Air*" patent number 7413145 for "*Systems and Methods for Aerial Dispersion of Materials*" and all the Alzheimer's, asthma, autism, blurred vision, cancer, headaches, immune system decline, muscle weakness, skin disorders, and tinnitus.

Tests reveal alarming levels of chemicals and metals in blood and urine. One can write a letter of complaint to *Governor and Mrs. Kitzhaber* at 160 State Capitol, 900 Court Street, Salem, OREGON 97301-4047.

(Sources: www.geoengineeringwatch.org; and CHEMTRAILS, HAARP, AND FULL SPECTRUM DOMINANCE OF PLANET EARTH, by Elana Freeland)

Disaster Aid

To aid victims of fire near *Shasta*, call **United Way** at 541.773.5339. The **American Red Cross** and **Salvation Army** will also accept donations. The SHASTA REGIONAL COMMUNITY FOUNDATION's *Community Disaster Relief Fund* is online at <http://www.shastarcf.org>.

Two Fire Department Chiefs have requested the *Public Utilities Commission* to investigate the risk of "*Smart Meters*". *Fire Chief Michael Hernandez* of Reno, NEVADA, and *Fire Chief Tom Garrison* of Sparks, NEVADA, linked a string of nine recent fires in NORTHERN NEVADA to smart meters. One could let your city's Fire Department know "*Smart Meter*" safety claims may be unsubstantiated. Fire Chiefs can, you know, find ways to let communities know the meters are dumb.

(Source: September 15, 2014, DAILY TIDINGS, "*Smart meters linked to string of fires*" Reno, NEVADA)

Volcanic Ash and Dust

The *Bio Engineering* and *Geo Engineering* lethal programs are underway, but MOTHER EARTH knows how to take care of herself with volcanic ash and wildfires. For example the 10,062-foot high MOUNT ONTAKE volcano has erupted 130 miles west of *Tokyo*, JAPAN. It is still erupting on the main Japanese island of *Honshu*. Man has none excuse for spraying millions of tons of expensive chemical aerosols and toxic metals into the sky. The original problem of global warming plus *Geo Engineering* equals double trouble. That's because one plus one is two, not zero.

(Source: September 29, 2014, MAIL TRIBUNE, "*Japan At least 31 killed by volcanic eruption*" by *Mari Yamaguchi*" The Associated Press. TOKYO)

Ron Wyden's "Smart Track"

US Senator Ron Wyden's "Smart Track" may be the "Fast Track" in disguise. How about cutting the nonsense because Corporate entities are a piece of paper, *not* breathing souls. It might behoove elected officials to represent humanity, *not* the Beast of Trade upon the Seven Seas because voters actually do have the power to impeach and recall.

Governor Kitzhaber's OREGON

Governor Kitzhaber probably already knows that Oregonians value clean air, clean water, their property, and wild lands. It's a red flag that regulators approved a crude oil train terminal near *Clatskanie* for unloading NORTH DAKOTA oil from trains onto barges headed to CALIFORNIA and WASHINGTON refineries. That means moving 1.8 billion gallons of crude oil along the *Columbia River* and through *Portland*, OREGON, annually.

Urgent letters are needed because of the proposed *Jordan Cove* **Pacific Connector Liquefied Natural Gas (LNG)** export project that would increase fracked gas demand. It's a no brainer that the proposed LNG means eminent domain would be used to trespass through salmon habitat from the *Rogue River* to the *Coos Bay*, putting hundreds of miles of oil pipeline through farms, forests, and ranches.

At least the *Department of State Lands* denied the permit for a coal terminal proposal that would have transported coal down the *Columbia River* on barges to the *Port of St. Helens* on its way to ASIA. The state regulators upheld the *Columbia River Tribes* fisheries tribal rights.

(Sources: Source: August 21, 2014, DAILY TIDINGS, Wire Reports; August 19, 2014, MAIL TRIBUNE, "*Oregon agency rejects coal terminal*" by Steven Dubois, The Associated Press. PORTLAND)

The UN Human Rights Commission

The *United Nations* (UN) researched and found that the food growers who actually deliver positive benefits to the environment and human health by feeding the world's population while safeguarding biodiversity and the health of the soil are small-scale family farmers. That's why the UN *Human Rights Commission* declared 2014 as YEAR OF FAMILY FARMING.

Just suppose you learned more by watching the 28-minute 2012 documentary film, *Seeds of Freedom* produced by THE GAIA FOUNDATION and the AFRICAN BIODIVERSITY NETWORK. The film is narrated by *Jeremy Irons* and is available from www.ResponsibleTechnology.org.

The Codex Alimentarius

In 1963 the *United Nations* (UN) and the *World Health Organization* (WHO) established *Codex Alimentarius* to maintain worldwide food standards. **The Codex Alimentarius Commission has recently decided labeling *Genetically Modified Organisms* (GMO) food is alright.**

(Sources: GUINNESS WORLD RECORDS 2013 *Discover a World of New Records*; CENTER FOR FOOD SAFETY, Andrew Kimbrell Executive Director, akimbrell@centerforfoodsafety.org, 202.547.9359)

The Ecumenical Ministries of Oregon

The Ecumenical Ministries of OREGON has endorsed YES on Measure 92 to LABEL GMO food. That means that in the field of all possibility one million Church-goers in OREGON who are registered voters could pass GMO labeling with a majority 51 percent if they all turn in their ballots. I wouldn't tell you their candlesticks are lit because I said up front I wouldn't tell you.

(Source: Rick North, hrrnorth@hevanet.com, 503.968.1520)

Bio-Insanity

Calling GMOs "*Bio-Engineered*" or "*Bio-fortified*" is just one more bio-insanity. All the bio-euphemisms are avoidance tactics. The bio-bullies need to learn honesty, instead of kicking and screaming against the words, "*Genetically Modified*" and "*Genetic Engineering*" which they coined in the first place.

What happens when Oregonians may already know that Big Money's misinformation campaign is for the purpose of confusing voters. A person is able to find get really clear about the fact that GMOs are something other than hybrids or selective breeding.

Someone once said that Nature's intelligence would never put fish into strawberries or apples. The Great Mother might want Man to stop putting human or daffodils into rice and to refrain from splicing scorpion toxin into cabbages. If you think about it Nature has none transgenetic species. Man doesn't have to understand Nature's innate wisdom is best. *Not* in three billion years would Nature have ever "*engineered*" or "*patented*" Genetics. MOTHER NATURE's intelligence would not defile EARTH with such abomination for the purpose of profits. Nature would never betray The Commons. You see Nature loves Man. And Nature loves her flora and her fauna. Nature has none laboratory spear guns.

It's always really interesting to see whom the Universe selects to defend the *Beautiful Land of Light*, this planet EARTH. It is darkness, rather than Light, for the Moneybags to try to keep their adulterated *Genitally Modified Organisms* (GMOs) hidden.

October 3, 2014

Page 5

How surprised would you be if CONGRESS just killed the distasteful **HR4432 “Safe and Accurate Food Labeling Act of 2014”** because it nullifies requiring the words, “*Produced by Genetic Engineering*” on food containing *Genetically Modified Organisms* (GMOs).

In light of the Non-GMO movement recently held a worldwide conference in *Shanghai, CHINA*, as well as an international conference in *Portland, OREGON* it does seem that Higher Consciousness is rising. You can hope so because it's such a nice way to keep talking and keep the everyday GMO conversations open because people love to hear reasons for things. You can just use enlightenment and discover how powerful it is.

Calling MONSANTO's Bluff Is A Human Right

“Food is weaponry. Whoever controls the food, controls the people.” –Henry Kissinger

CONNECTICUT, MAINE, and VERMONT passed mandatory GMO labeling laws in the USA. Check inside and see what you want. Some people might get feelings of comfort in wanting GMO food labeled, despite all the boos by BAYER, BASF, DOW, DUPONT, MONSANTO, SYNGENTA, and their cronies. Maybe you haven't yet realized out-of-state Moneybags can outspend grassroots labeling initiatives any day. But Corporations *don't* get to vote. They can only try in vain to influence voters. That's just an observation. The first thing most voters do is to check inside to see if they are one of those people who can see through motives.

You might notice your feelings about “*Money is Free Speech*”. But as you begin to relax you realize Oregonians are irritated with Big Money's ad heckling. Most people probably “Get it” that marketing distortions are full of bull. For example MONSANTO and Company's *Money Trail* goes all the way back to 1947 when they falsely advertised, “*DDT so safe you can eat it*”. The bluffers haven't changed their strategy much.

In 1947 MONSANTO advertisements showed children in a kiddies swimming pool being sprayed with DDT. Their spot ads claimed household pests had to be chemically “*controlled*”. In another ad cartoon characters sang, “*DDT is good for me-e-e!*” The safety claims were, of course, unsubstantiated bluffing, as are present-day promotional mailers and radio/TV ads to sway voters into self-sabotage. But after awhile the public eventually sees through the bluff. Proof of that is the 64-other countries that made MONSANTO move over. In nations where labeling GMOs is mandatory, it has *not* raised the price of food. That argument is a *smoke screen* behind which the USA subsidiaries of multimillionaire transnational giants and their supply chain hide. But you are *not* a pest to be chemically “*controlled*” or exterminated.

Simplify Your Life

Will you close your eyes and remember joy is YOUR *True Nature* now, or will you keep your eyes open a little longer to help heal the planet. How surprised will you be when those who have been on the side of darkness may step over to the side of Light. All beings may awaken and attain enlightenment. *Imagine that.*

Grandmothers and others, your book discussion group could read *Jeffrey M. Smith's* two international bestselling books **Genetic Roulette** and **Seeds of Deception**. *Mr. Smith* makes good sense for someone. If a person prefers to view video in a favorite place, one can get comfortable with *Jeffrey Smith's* short 42-minute documentary **Health Risks of Genetically Modified Foods**, a 16-minute film called the **Politics of GMOs**, and **12 Public Service Announcements**. *Mr. Smith's own permission is printed on the disc label itself, for showing on TV, and to groups, and to duplicate for non-commercial purposes.*

Another way to uncomplicated your life is to read and discuss *Elaine St James* entitled, *Simplify Your Life, 100 Ways to Slow Down and Enjoy the Things That Really Matter*. It might be easier than you imagine to come out of materialism, simplify your life, prepare to teach what is really important in life, emphasize family, and be a Light.

(Sources: www.ResponsibleTechnology.org, "*Seeds of Freedom, The Documented Health Risks of Genetically Modified Foods, The Politics of GMOs, and 12 Short Public Service Announcements*")

Obtain Back Issues

The Eco-Community Dialogues newsletters are a FREE community service, available by request, at the *A Street Print & Parcel* at 258 A Street, Suite 1, in Ashland, OREGON, across from *ACE* hardware. The print shop only charges for paper and ink, or will download the entire PDF file of current and back issues onto people's zip drives to read off their computers and save paper and ink. It's up to you to provide your own zip drive.
